## Who we are:

Dotscene is a start-up, specialized in mobile mapping, that develops and distributes both hardware and software for mobile 3D laser scanning. The mobile 3D laser scanner dotcube developed by us is optimized for outdoor use as well as for indoor use and on drones. Specialized on the requirements of the real estate industry, dotscene GmbH provides the evaluation of the captured scan data and the CAD modelling as a service.

**We are hiring!**

## Backend Developer (f/m/d)

You want to contribute to our dynamic, international and multidisciplinary team? You are mesmerized by efficient workflows, databases and cloud management?

As backend developer you are in charge of our web platform and scan data processing in the cloud. You develop joint solutions with our 3D mapping software experts to ensure smooth operations in the cloud and create new features for our pipeline.

**We digitize to futurize!**

And need you for our ambitions.

---

### Skills:

- Bachelor's or Master's degree in a technical major
- Backend development with state-of-the-art technology (e.g., with Laravel, Django, Express.js or Symfony)
- Database handling and architecture
- Experience with cloud services such as AWS, Azure or Google Cloud Platform

---

### Nice-to-have:

- Experience in modern frontend development (e.g., with Angular, React or Vue.js)
- German language skills
- C++
- Linux server and network administration skills

---

### We offer:

- A tight fit team with flat hierarchies in which your work really counts!
- Working in a top location in the middle of beautiful Freiburg
- Pretty point clouds
- "Innovation Friday" - time to push your own dotscene pioneer project
