

# Working Student Android App Development (f/m/d)

*Specialized in 3D-Laserscanning, we develop innovative hard and software solutions for efficient capturing and processing of digital 3D twins of real estate.*

You want to become part of our dynamic, international and multidisciplinary team? As working student for Android app development, you implement new features, maintain the codebase and work on future generations of our app for sensor control. Together with our designers and software development team you ensure code quality and smooth sensor control. If interested, you can also contribute to UI/UX design.

## Your skills

- Student in a technical major, e.g., Computer Science
- Experience in Android app development with Kotlin or Java
- Ability and desire to learn and grow professionally
- Fluent in English

## Nice-to-have

- Passion for intuitive user interfaces and UIX
- Experience in working with git
- Interest in CI / CD

## We offer

- A tight fit team with flat hierarchies in which your work really counts!
- Mentoring from senior engineers
- Flexible working hours
- Free coffee and pretty point clouds
